DETAILED ACTION

Those persons making the oath or declaration should acknowledge the duty to disclose to the Office all information known to the person to be material to patentability as defined in 37 CFR 1.56. This may include, but is not limited to, prior publication, knowledge, patents, foreign patents, etc. See *Dayco Prod., Inc. v. Total Containment, Inc.*, 329 F.3d 1358, 1365-69, 66 USPQ2d 1801,1806-08 (Fed. Cir. 2003) (contrary decision of another examiner reviewing substantially similar claims is material; copending application may be material even though it cannot result in a shorter patent term, when it could affect the rights of the patentee to assign the issued patents). See also *KangaROOS U.S.A., Inc. v. Caldor, Inc.*, 778 F.2d 1571, 1576, 228 USPQ 32, 35 (Fed. Cir. 1985).

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The instant claims recite that the delivery system have a Response Factor that is at least about 1.5 as measured by Test Protocols I or II. It is unclear what applicant intends by this language. How does one of ordinary skill determine what the test protocols are and when the criteria are met? Further clarification is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over USP 3,681,248 or USP 4,209,417.

Both of the above-mentioned patents teach a polymer particle and a perfume benefit agent. The instant claims are product-by-process claims where the components are a polymer particle and a benefit agent. Claim 2 additionally requires a granular or liquid matrix. The components of the above-mentioned patents are the same as that instantly claimed.

“[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the

prior product was made by a different process.” In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

“The Patent Office bears a lesser burden of proof in making out a case of prima facie obviousness for product-by-process claims because of their peculiar nature” than when a product is claimed in the conventional fashion. In re Fessmann, 489 F.2d 742, 744, 180 USPQ 324, 326 (CCPA 1974). Once the examiner provides a rationale tending to show that the claimed product appears to be the same or similar to that of the prior art, although produced by a different process, the burden shifts to applicant to come forward with evidence establishing an unobvious difference between the claimed product and the prior art product. In re Marosi, 710 F.2d 798, 802, 218 USPQ 289, 292 (Fed. Cir.1983).

4. Claims 12-16 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 3,681,248 or USP 4,209,417.

USP 4,209,217 teaches the separate addition of polymer and perfume is added to create the particles. See col. 2, lines 19-24. USP 3,681,248 teaches the claimed method in Examples 2 & 3. With regard to claims 13 and 16, it is the Examiner’s position that these properties are inherent to the disclosures of the above-mentioned patents.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monique T. Cole whose telephone number is 571-272-1255. The examiner can normally be reached on Monday, Tuesday & Thursday.
